

AZKOYEN ZENSIA - DEMO

Bean-to-Cup Coffee Machine

Zensia is not just another vending machine. Its Customixer functions make it an automatic barista vending machine. Zensia is capable of making drinks with different amounts of coffee, milk and sugar, adjusting each service to the customer's taste.

Zensia, the automatic barista for vending

This capacity to customise drinks, combined with the machine's remarkable autonomy and its clean, attractive appearance, helps operators increase the profitability of their vending service.
