

WATER LOGIC WL100

Water Dispenser

THREE STEPS TO GREATNESS

This WaterLogic dispenser has 3 core technologies, which mean that what you get out of your machine is much better than what goes in:

Filtration: our filtration technology is really good at taking the bad stuff out and leaving the good stuff in. This stage removes chlorine and other water-borne tastes and odors.

Direct Chill: next, direct chill technology cools the water. A tube with refrigerant gas runs in a spiral alongside the water tube, chilling it to 5C or 12C.

BioCote®: we've got the inside covered and the outside too. As another layer of defense, BioCote keeps the dispensing area free of bacteria.

- ✓ Constant fresh, pure water from direct chill technology to refresh and invigorate
- ✓ Ideal capacity for the small workplace
- ✓ Hot, cold and ambient options
- ✓ Easy connection to your existing mains water supply
- ✓ Value-for-money entry-level model
- ✓ Smart design with simple buttons and icons or ease of use
- ✓ Freestanding and counter top options to suit every workplace
- ✓ Available with work surface top - ideal for coffee machines
- ✓ Sleek modern look improves office environment

Machine Specifications
